CHOICE is the keynote of today's career

Would you go to Europe, Japan or Korea?

Or would you stay near home? Any man who has had prior service in the Armed Forces may elect to do any of these things if he enlists in the Army now for 3 years or more. He can choose to be assigned directly to duty in Europe or with one of five famous Infantry divisions in the Far East. Or he may choose to be stationed near home for the first full year of his enlistment (where there are vacancies). Men with or without prior service may choose one of the famous combat divisions in Japan or Korea.

Would you select a career in aviation?

This you can do, and be guaranteed the training you choose before you enlist! Only requirements beyond regular physical and mental examinations are that you be a high school graduate, or that you are in the Air Force and can qualify. It's today's great opportunity to write your own ticket in the Air Force.

Would you want to learn to fly? If you are single, 20 to 26½, and have had two or more years of college education or the equivalent, you can become an Aviation Cadet with the U. S. Air Force. Nowhere else can you get better training, for nowhere else is aviation advancing as fast or as far as in our own Air Force.

Would you go to a leadership school?

If you have qualities of leadership, would you want to develop them to their fullest? U. S. Army Leadership Schools are now selecting likely candidates from servicemen to take these valuable courses.

The Army and Air Force are doing everything possible today to help each individual develop along the lines that he picks for himself. Army and Air Force training is thorough and take-home pay is better than most civilian jobs. Opportunities for advancement are wide open to every man in uniform. Make your choice today at your U. S. Army and Air Force Recruiting Station.

Flood-Proof Fence

Used in Australia

Lays Flat While Drift Wood and Water Pass

A fence which bows before the onslaught of flood waters and lies flat while water and drift-wood pass over is being used in Australia. The posts are 33 feet apart and two wooden droppers are placed between the posts and another along each side post. The posts are bored with holes 4 inches from the ground

and 1½ inches from the edge of the post, and another 3 inches from the edge. These posts are 6 feet long, 3 feet 6 inches above ground. The droppers are bored 4 inches from the bottom and then 6 inches, 7 inches, 8 inches and 11 inches, allowing the top barbed wire to rest on the side of the dropper, to which it is tied through the hole with the wire. The droppers are 3 feet 10 inches long. The bottom wire is reeved through the droppers and then through the posts. Each dropper near a post has a piece of wire passed around the top of the post, then around the dropper so that it will give way in flood time and allow the fence of droppers to collapse. The bottom wire, 4 inches from the ground, holds the fence to the posts. After the flood has subsided, all that is necessary is to stand the fence of droppers upright again and attach it to the posts as before.

Uncle Sam Says

There's no question about the importance of a decision when you come home with a United States Savings bond in your pocket on pay day. Each additional savings bond you acquire through your participation in the Payroll Savings Plan where you work at the Bank of Appomattox where you bank is another score for you and your family. Get safely to home plate as many times as you possibly can now while your hitting power in the automatic savings league is at its greatest strength.

Pamplin
